

As many as 1 in 5 gay and bisexual men
have attempted suicide.
We don't know why.

A research study in Vancouver is gathering personal life-stories of men who have attempted suicide as an adult, in order to better understand this important issue.

If you...

- ✓ Identify as a gay, bisexual, queer, or two-spirit man or trans-man, or are sexually attracted to other men,
- ✓ Are 30 years of age or older,
- ✓ Have attempted suicide since age 21, and
- ✓ Are 2 years beyond your most recent suicide attempt

... then we are interested in hearing your story in a confidential 1-on-1 interview.

By participating you will help to improve suicide prevention efforts that work for our communities.
