

Indicators Related to Foundational Activities in the CBO Sector Logic Model

Indicator 39: Percent of peers that report skill development following participation in workshops/retreats offered by CBOs	
Description	 Percent of peers that report developing their skills following their participation in workshops/retreats offered by CBOs providing HIV and HCV programs and services.
Significance	Development of skills may be necessary for people living with HIV and HCV that are unfamiliar with health care settings or lack social and work-related skills (Brashers, et al., 2009). Interactions with others living with HIV has been found to lead to the development of decision-making and self-advocacy skills (e.g. information seeking) (Brashers, et al., 2000).
Data source	Survey with participants of peer workshops/retreats
Possible disaggregation	Type of skills developed (e.g. self-advocacy skills, confidence to manage health, HIV coping skills, work-related skills, etc.)
Limitations	Reliance on self-report responses
