

# OVER 4000 CANADIANS DIED IN 2017 due to fentanyl poisoning

This number is greater than the total number of deaths of all other Public Health Emergencies in the last 20 years including SARS, H1N1, and Ebola.

Those who have died were valued citizens of this country; our children, siblings, spouses, parents, family members, neighbours, friends.

# PETITION TO THE HOUSE OF COMMONS TO ADDRESS THE OPIOID CRISIS

- 1.** Declare the current opioid overdose and fentanyl poisoning crisis a National Public Health Emergency
- 2.** Reform current drug policy to decriminalize personal possession
- 3.** Create a system to provide safe unadulterated access to substances to reduce imminent risk of overdose due to a contaminated source
