

## It's Hepatitis C and B BINGO TIME!

Directions: Write your name at the top of the Card.

- Listen to the NUMBER and the Question.
- If you see the Answer in a box, write the NUMBER on top of it. [FACILITATOR: Depending on the group, you may get the group to orally shout out the answer, so participants can confirm they marked correctly.]
- If you get a full vertical, horizontal, or diagonal line, yell BINGO as fast and as loud as you can and someone will come to check your card and bring you a prize!

1	cancer	People with cirrhosis are at increased risk of getting this serious, often deadly disease.
2	condoms	When engaging in sex with a new person, you or your partner should always use a barrier such as a dental dam or one of these.
3	birth	Vertical transmission means a baby gets hepatitis C or B from its carrying parent before or during this event.
4	vaccination	You can get this to prevent hepatitis A and B, but there isn't one yet for hepatitis C.
5	prison	People who live in this place have much higher rates of hep C than people living outside it.
6	blood	Hepatitis C virus lives in this liquid, and can only be spread through this liquid.
7	kidneys	Hepatitis C doesn't only harm your liver; it can also damage heart, brain or this other organ.
8	water	To keep healthy, drink a lot of this liquid.
9	four (4)	There are this number of stages or degrees of liver damage or scarring. Highest # is the highest, worst degree of liver damage, also called cirrhosis.
10	anal	For this kind of sex, protection is especially needed to prevent hepatitis C or B.
11	hepatitis C	This is the first chronic disease caused by a virus that can now be cured.
12	HIV/AIDS	Many PWIDs and MSM are living with both this virus and with hepatitis C.
13	urine	Hepatitis C or B are never spread through this yellow liquid.
14	hepatitis B	This kind of viral hepatitis is often spread through both semen and blood.
15	80,000	This is approximately the number of people who have been diagnosed with hepatitis C in BC.
16	transplant	If a person's liver is very damaged, they may die unless they get a new liver through this operation.
17	sores	Hep C or B can be spread sexually if there is blood, STIs, or "open" types of these present during sex.
18	equipment	If you use IV drugs, always use ALL your own needles, syringes, and other types of this.
19	symptoms	Most people with hepatitis C do not have any of these until they are very ill.
20	cure	In most cases, treatment with new hepatitis C drugs actually results in this great thing!
21	true	True or false? You can get hepatitis C by sharing a cocaine straw, or meth/crack pipe.
22	cirrhosis	With this disease, your liver becomes too stiff or scarred for blood to easily flow in or out.
23	transfusion	Before 1992, many injured or ill people got hepatitis C or B through infected blood from this procedure.
24	Fibroscan	This new machine can painlessly detect and measure how stiff or damaged your liver is.
25	300,000+	The number of people ever exposed to hepatitis C in Canada is AT LEAST this number.
26	liver	Hepatitis A, B, and C, or consuming too much alcohol or fat can damage this organ.
27	alcohol	To protect your liver, cut down or avoid drinking this liquid as much as possible.
28	false	True or false? You can get hepatitis C or B from sharing saliva or deep kissing.
29	two (2)	This number of blood tests are needed to know if you have an active hepatitis C infection.
30	stigma	Examples of this bad attitude are fear, dislike or avoidance of people with certain diseases.
31	mosquitoes	These small animals do NOT spread hepatitis C or B.
32	hepatitis A	This type of hepatitis is spread through oral/fecal ways (hand, mouth, food, water, poop)
33	doctor	During and even after hepatitis C treatment, you still need to visit this person regularly.

Created by **HepCBC Hepatitis C Education & Prevention Society**. [www.hepcbc.ca](http://www.hepcbc.ca). To make your own word lists into BINGO, it costs \$12 for lifetime membership to this site: <http://www.print-bingo.com/>
