

Health-related Quality of Life & Patient Reported Outcomes in HIV Management

You are Invited!

It is our pleasure to invite you to participate in our educational program.

The Connexion is a *non-promotional* and *non-product-focused* learning program by Gilead, developed to bring relevant and up-to-date scientific information on HIV to the Canadian HIV community. Topics for this program are selected based on the community learning needs assessment we conducted.

This year, we will explore different topics on HIV and how they are relevant to *long-term success* of people living with HIV.

This webinar session will focus on:

- Describing the concept of health-related quality of life and patient-reported outcomes and discuss its potential impact on the physical and psychosocial care needs and outcomes of people living with HIV in Canada
- Describing and discussing ways to utilize health-related quality of life and patient-reported outcomes for the successful long-term management of HIV

Speaker

Dr. Bertrand Lebouche, MD, PhD

HIV and HCV Primary Care Specialist at the Chronic Viral Illness Service of the Glen Hospital, McGill University
