

# 6 STBBI's Looking For Love

Swipe right on knowledge! This sheet was developed when PAN and Interior Health partnered for a Regional training with a focus on Sexual Health. Although STBBIs may not be your dream date, getting to know them is important. Training participants created dating profiles for sexually transmitted and blood-borne infections (STBBIs). Just like people, each STBBI has their own traits, habits, and quirks. Think of this as a dating for your health: the more you know, the better your chances of avoiding an unwanted match. See if you can guess the infections and viruses below.

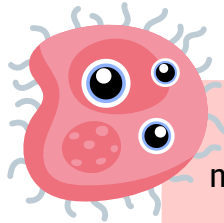

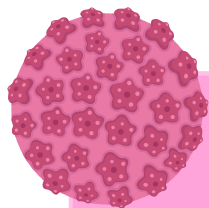

## "The Master of Disguise"

I'm really popular and currently spiralling. I might look painful at first but I'm not. Chancre? I hardly know her. I like to dress in red polka dots. I used to be more into GBMSM but now I really like to get around. You can get rid of me but [my impact] will always be with you. I'm open to children, and in the end, I'll drive you crazy.

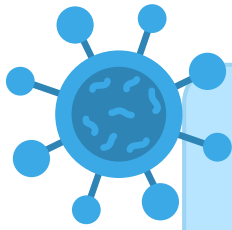

## "The Silent Type"

I am quiet and mysterious but my friends call me popular. I'm quite a people person. I'm mostly an introvert, but when I'm inspired, I show my fiery side. Overall, I'm just passionate about spreading my joy. I'm looking for open relationships and I'm not interested in having any kids. The more partners the better; female preferred but open to all. Trust is everything for me; no testing required.

## "The Social Butterfly"

I'm definitely the most popular one here, I would hit anyone under the right circumstances. I'm open to all connections but I'm really into long term relationships, so getting rid of me might be a slow burn. If you treat me right I'll be at your cervix, but I can meet you around back. Some people might say I have multiple personalities and that's why they're trying to cancel me, now more than ever. Ladies, if you're interested in my profile and want to find out more, you can find me online and I'll come right to your door.

## **"The On-Again, Off-Again Type"**

Some people call me a stage 5 cling on...The first time you meet me I can come on really strong, and by our second and third hook up I'll simmer down. I can be sensitive...even a little weepy, AND I mate for life. When times are tough I'll be ALL over you. I may get on your nerves, and I'll be watching from within.

I'm open to inviting others into our cluster and Im DEFINITELY a "show-er". I want to get to know ALL parts of you, you'll find me showing up in places I've never been before. FUN FACT- I've gone viral on Tik Tok.

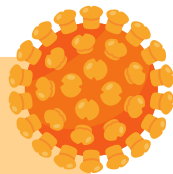

## **"Long-Term Commitment"**

I'm looking for the opportunity to meet warm hearted individuals regardless of gender.

I can get you when you're down. I have three stages to my connection. The honeymoon can last 2-4 weeks after our first hook up. You're going to feel hot and steamy at first. Then I get a bit shy, but don't forget about me. I'm still here. I may be toxic, but I'm with you for life.

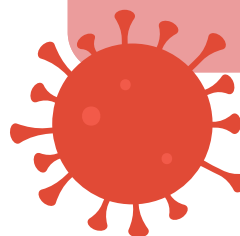

I like to do ART to help manage my more challenging qualities.

I'm a survivor. I've been around for decades, and I'm still here, stronger than ever. I mutate, I adapt, and no one can get rid of me.

## **"Close Contact Crasher"**

I'm an international spotty heartthrob, a rare catch that can you make you feel real hot and sweaty. I'm not your average fling- I will stick around in your sheets for weeks. I'm looking for skin to skin and I like to keep it casual and cruisy; dirty laundry. Dislikes: long distance isn't my thing. My fave song on Spotify is Strange Animal.

**Answer Key:** "The Silent Type"; Chlamydia; "The Master of Disguise"; Syphilis; "The Social Butterfly"; HPV; "The On-Again, Off-Again Type"; Herpes; "Long-Term Commitment"; HIV; "Close Contact Crasher"; Mpox
